Analyses of Fruits and Vegetables

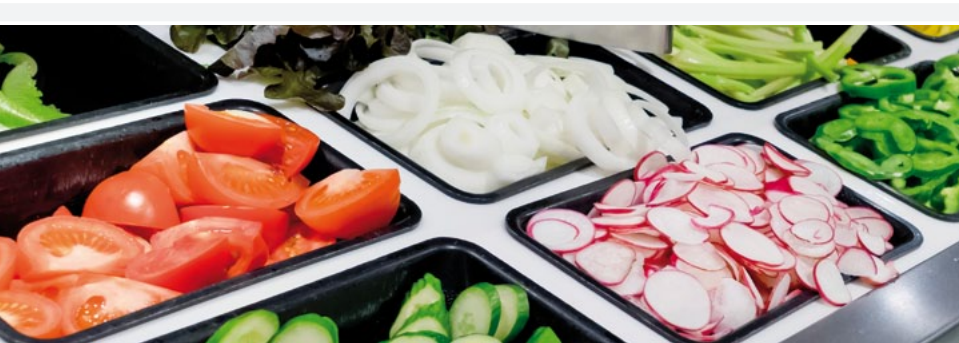

Fruit and Vegetables – Our Source of Vitamins

When it comes to fruit and vegetables, consumers expect absolute freshness, the widest variety possible, the best quality, and all of that preferably at every time of year. However, the effects of weather conditions or pests are unforeseeable and can only be offset by the use of pesticides. The industry also has to deal with further contaminants, such as microbiological exposure. Producers, suppliers, and retailers all similarly have to face and overcome these challenges.

By continuously working towards optimization, we are capable of delivering the results of many analytical methods on the same day. Further express analysis options are also available for you.

The GBA Group provides you with comprehensive expert consulting and a wide variety of product-specific analyses, so that you can maintain the level of quality assurance required for trading your products.

GBA GROUP Analyses of Fruits and Vegetables

Analyses of Fruits and Vegetables

Analyses

- Pesticide multi-method
- Polar multi-method (Ethephon, Chlormequat/ Mepiquat, Fosetyl-Al/ Phosphonic acid, Perchlorate/Chlorate)
- Dithiocarbamates
- Nitrate
- Heavy metals
- Microbiology
- Phenoxy alkanolic acids
- QAC'
- Bromide

Pesticides Results

- 12 hours
- 24 hours
- 48 hours
- 3-4 days
- The scope of the pesticide multi-method is based on the current requirements of the German retailer standards, DFHV and QS
- Identification and quantification at trace levels up to 0,001 mg/kg

Possibilities for Evaluation

The evaluation of the results is conducted according to your needs, e.g.:

- ALDI, LIDL, EDEKA, REWE, Kaufland, Globus, Metro, Global 2000, etc.
- Your individual specifications

Additional Services

- Data entry into databases such as QS, FreshPoint and Fruitmonitoring (or your own database upon consultation)

Classifications and appraisals according to food laws

- Support on product-specific scopes of analysis
- Assessment according to regulations for plant protection

- Review of package labelling (declaration)
- Valuation of analytical results

Your Advantages

Services

- Advice on food law issues
- Individual customer service representatives
- Support from sampling to reporting of results
- Express analyses
- Customized IT solutions for data transfer

Expertise

- Long-term experience
- Profound technical knowledge
- Location-based analytical competencies
- Fast and smooth order processing

Quality

- Accreditation acc. to DIN EN ISO/IEC 17025:2005
- Continual and successful participation in inter-laboratory proficiency testing
- Participation in standard committees and DIN working groups
- Numerous memberships in professional associations
